

SPECIALISING IN:
MECHANICAL SERVICES • CONTROL SYSTEMS INSTALLATIONS • SWITCHBOARD MANUFACTURE

Pope Electrical are an electrical contractor, established in 1996, that provide;

- ⊗ Switchboard design, manufacture, fit-out and installation,
- ⊗ Electrical contracting services, specialising in the mechanical services sector, including;
 - airconditioning,
 - ventilation and,
 - refrigeration,
- ⊗ Automation and control systems integration, engineering, installation and commissioning,

We offer two control systems products for the building automation, HVAC and refrigeration markets;

For smaller, standalone and/or refrigeration projects we offer the Invensys Controls *Eliwell* product line.

As an Invensys Authorized Supplier we offer the entire Eliwell range; from the freely programmable *Freeway* range through to the range of parametric refrigeration controllers and industrial process controllers.

Eliwell products support open protocol communication through Modbus/TCP, Modbus RTU, Profibus, CAN bus, and Belimo's MP bus.

For medium to large projects, generally involving graphical front-ends, multiple open protocol interfaces to other systems and/or involving advanced reporting requirements we offer the *Loytec* product.

As a Loytec Competence Partner, we are committed to professional planning and completion of open automation solutions, by ensuring our staff are trained and delivering highest quality projects that exceed the customers expectations.

Loytec products support all of the open protocols including BACnet/IP, Modbus TCP (Master or Slave), LonWorks (CEA-709, CEA-852), HTTP, FTP, BACnet MS/TP, Modbus RTU (Master or Slave), M-Bus (Master EN 13757-3) and ZigBee PRO

For our electrical switchgear and control peripherals we utilise well known, quality suppliers, including;
